

For strong connections on the water

Get ready for the new season now!

As the season begins, it's important to inspect deck fittings and connections on board. Over time, wind, moisture, and salt water take a toll on deck connections and equipment—regular inspections ensure safety and longevity.

Marinetech's corrosion-resistant, precision-fit components offer durable solutions for maritime applications—including perfectly coordinated systems from a single source. **The product range includes, for example: Swivel deck hinges, (ball) joints, mast plates, tube connectors, railing supports, handrail sections, Monel rivets, and much more.**

Now NEW

mt Flush Fasteners® on board

The innovative countersunk screws with F-Head™ technology provide an almost completely flush finish thanks to their recessed drive – a clear advantage, especially in marine applications. Where no dirt, salt, or water can accumulate, corrosion is effectively reduced. The MT Flush Fasteners® are made of high-quality 316 stainless steel and have successfully passed salt spray testing for up to 500 hours.

MT Flush Fasteners® sizes M3 to M8 **now available in the shop »**
